GUIDELINES

1. Make sure important content is visible - nav-links displayed on navigation bar.
2. Create a design system (color, spacing, typography and components included).
3. Group related elements.
4. Align main layout to 12 column grid in desktop and tablet; 4 column grid in mobile.
5. Single typeface guideline used - sans serif (Inter) (regular font weight only).
6. Mostly left aligned text with some uses of center align for easy readability.
7. Minimize cognitive load - simple design used.
8. Contrast ratio - ensure WCAG guidelines are met.
9. Responsive design - design for multiple screens.

Hello! I'm Semer Nuru Ibrahim, a passionate software engineering student at AAiT in Addis Ababa, Ethiopia. I recently ventured into web development, where I discovered an interest for coding and design. I enjoy exploring the latest tech trends and seeing how they're applied in everyday life. I'm always excited to collaborate on innovative projects and bring creative ideas to life.

More About Me

Hiking brings me immense joy and satisfaction. Especially spontaneous ones!

Gifted Hands was an intriguing read. Ben Carson is just inspirational.

All time favourite movie. Divergent is always a good watch.

Basketball on a breezy day rejuvenates me. It's always a blast playing with my buddies.

Gaming has always been a big part of my childhood. CR and COC being all time favourites of mine.

School of Tomorrow, established in September 1993, is a premier private institution in Addis Ababa, offering quality education from Nursery to Pre-college levels.

Greek Community School in Addis Ababa, was established in 2015. It offers a blend of Greek and international educational systems, promoting academic achievement and multilingual proficiency.

Addis Ababa Institute of Technology (AAiT), established in 1953, is the leading technological institute in Ethiopia, offering a range of engineering and technology programs.

Detailed descriptions:

Attending School of Tomorrow from 2007 to 2015 was a remarkable journey, where I thrived in a nurturing academic environment, built lasting friendships, and engaged in numerous extracurricular activities. Those years were characterized by stimulating lessons, dedicated teachers, and a profound sense of community.

Transitioning to Greek Community School from 2015 to 2022, my high school years were enriched with cultural immersion and academic rigor. The multilingual learning environment, active participation in school events, and connections with diverse peers were truly inspiring.

Currently, as a student at Addis Ababa Institute of Technology (AAiT), I am thoroughly enjoying a vibrant university life. The state-of-the-art technology programs, collaborative projects, and dynamic campus activities are incredibly exciting. Being surrounded by enthusiastic peers and esteemed mentors is significantly shaping my future in the best possible way.

My Hobbies

Reading has always been my favorite hobby, offering an escape and a wealth of knowledge in every book. Diving into different genres, whether fiction or non-fiction, expands my mind and gives me fresh perspectives on various topics. Each book is like a new adventure, filled with captivating characters and stories. The quiet moments spent with a good book are my sanctuary, providing a break from the daily hustle. Through reading, I uncover new ideas, deepen my understanding, and spark my imagination, making it an essential part of my life.

One of my favorite pastimes is baking, filling my home with the cozy scents of fresh bread and pastries. I love trying out new recipes and refining my go-to favorites, whether it's a rich cake or a savory treat. The act of mixing ingredients, kneading dough, and watching my creations come to life in the oven is incredibly calming and rewarding. Sharing these homemade goodies with friends and family brings me immense joy. Baking lets me unleash my creativity and savor life's simple pleasures.

One summer, out of sheer curiosity, I picked up a crochet hook and some yarn, and little did I know it would turn into one of my favorite hobbies. At first, it was just a way to pass the time, but as I got the hang of it, I found myself completely immersed in creating intricate patterns and cozy items. The rhythm of the stitches became a calming routine, and the satisfaction of finishing a project was unmatched. Over time, crocheting became my go-to activity, a source of relaxation and creative expression that I look forward to.

I discovered my love for painting during my first art class in primary school. Each week, we painted different scenes, from serene landscapes to bustling cityscapes. I was captivated by the colors, the creativity, and the freedom to express myself on canvas. The joy and fulfillment I felt while painting made it clear that this was a passion I wanted to pursue.

Profile

I'm a hardworking person with passion for learning and personal growth. My varied educational background has helped me develop skills in creativity, problem-solving, and communication. Currently, I'm studying at Addis Ababa Institute of Technology (AAiT), where I enjoy using my technical and people skills on innovative projects and teamwork. I'm excited to apply my knowledge to real-world challenges and strive for excellence in everything I do.

Skills

I am proficient in a range of programming languages and technologies, including HTML, CSS, JavaScript, MySQL, Python, and Java. In addition to my technical skills, I am multilingual, with fluency in English, Amharic, and Arabic. My diverse skill set enables me to approach projects with a comprehensive understanding of both the technical and communicative aspects, ensuring effective collaboration and high-quality results.

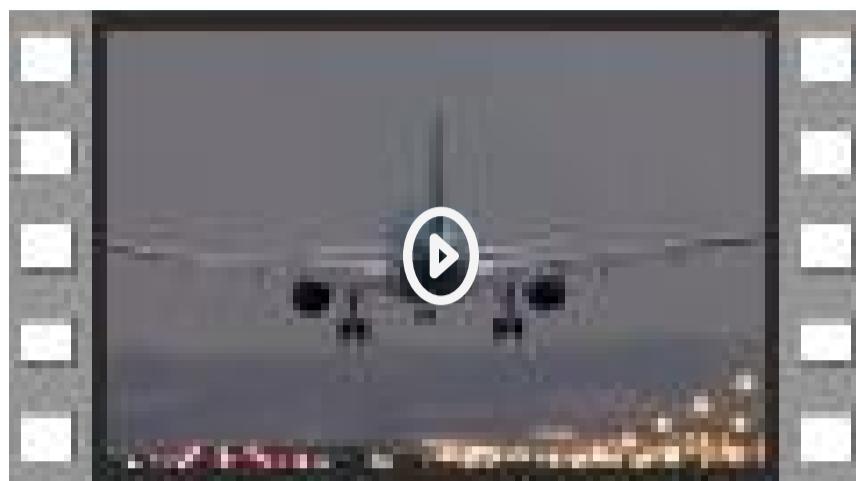

Education

Primary Education 2007-2015 at School of Tomorrow. Secondary Education 2015-2022 at Greek Community School. Undergraduate Degree 2022-2027 at AAiT.

Experiences

I had the opportunity to work with Cisco during my networking course, which provided me with a solid foundation in network infrastructure and management. For my database course, I extensively used MySQL, gaining hands-on experience in database creation, manipulation, and management. Additionally, I learned Java and Python in my programming courses, where I implemented various data structures and algorithms, enhancing my problem-solving skills and understanding of computational efficiency. These experiences have been instrumental in shaping my technical expertise and preparing me for future challenges in the tech field.

Traveling

Traveling is one of my greatest passions, as it will allow me to explore the world's breathtaking monuments and natural wonders. From the towering skyscrapers of bustling cities to the serene landscapes of remote countryside, each destination offers a unique experience. The thrill of discovering new places, soaking in the beauty of diverse environments, and capturing these moments through photography will make every journey a memorable adventure.

Culture

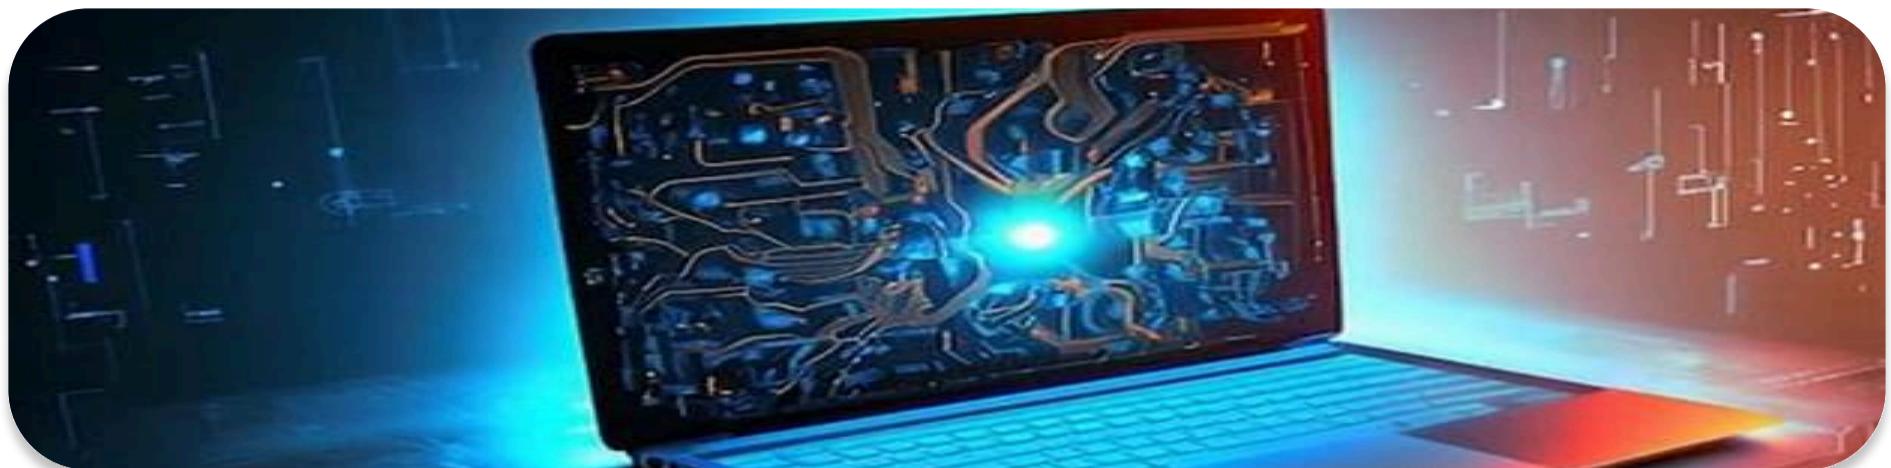

My interest in culture is equally profound, as I love diving into the art, literature, cinema, cuisine, and traditional costumes of different societies. There's something incredibly enriching about understanding the way of life of others and appreciating the creative expressions that define their identity. Whether it's visiting museums, enjoying international films, savoring exotic dishes, or learning about historical customs, every cultural encounter broadens my horizons and deepens my appreciation for the world's diversity.

Emerging Technologies

- Quantum Computing: Potentially revolutionizing computing power.
- 3D Printing: Creating medical implants to houses.
- Internet of Things (IoT): Connecting everyday devices for efficiency.
- Augmented Reality (AR) and Virtual Reality (VR): Transforming gaming, education, and healthcare.
